System Device Help

ID **Key** Sector File ePurse Person Product RBlock Wblock Tools

Key Set  
☒ KeyA ☐ KeyB

Auth Key: \*\*\*\*\*

Select "KeyA", the "KeyB" was not activated before shipped. How to use the KeyB is complex and hard. If you want, please see the S50 card's datasheet. Usually the "KeyA" is enough.

Except the ID, you have to input the auth key before read or write any data in the cards. The default key is 12 F.

Change Key

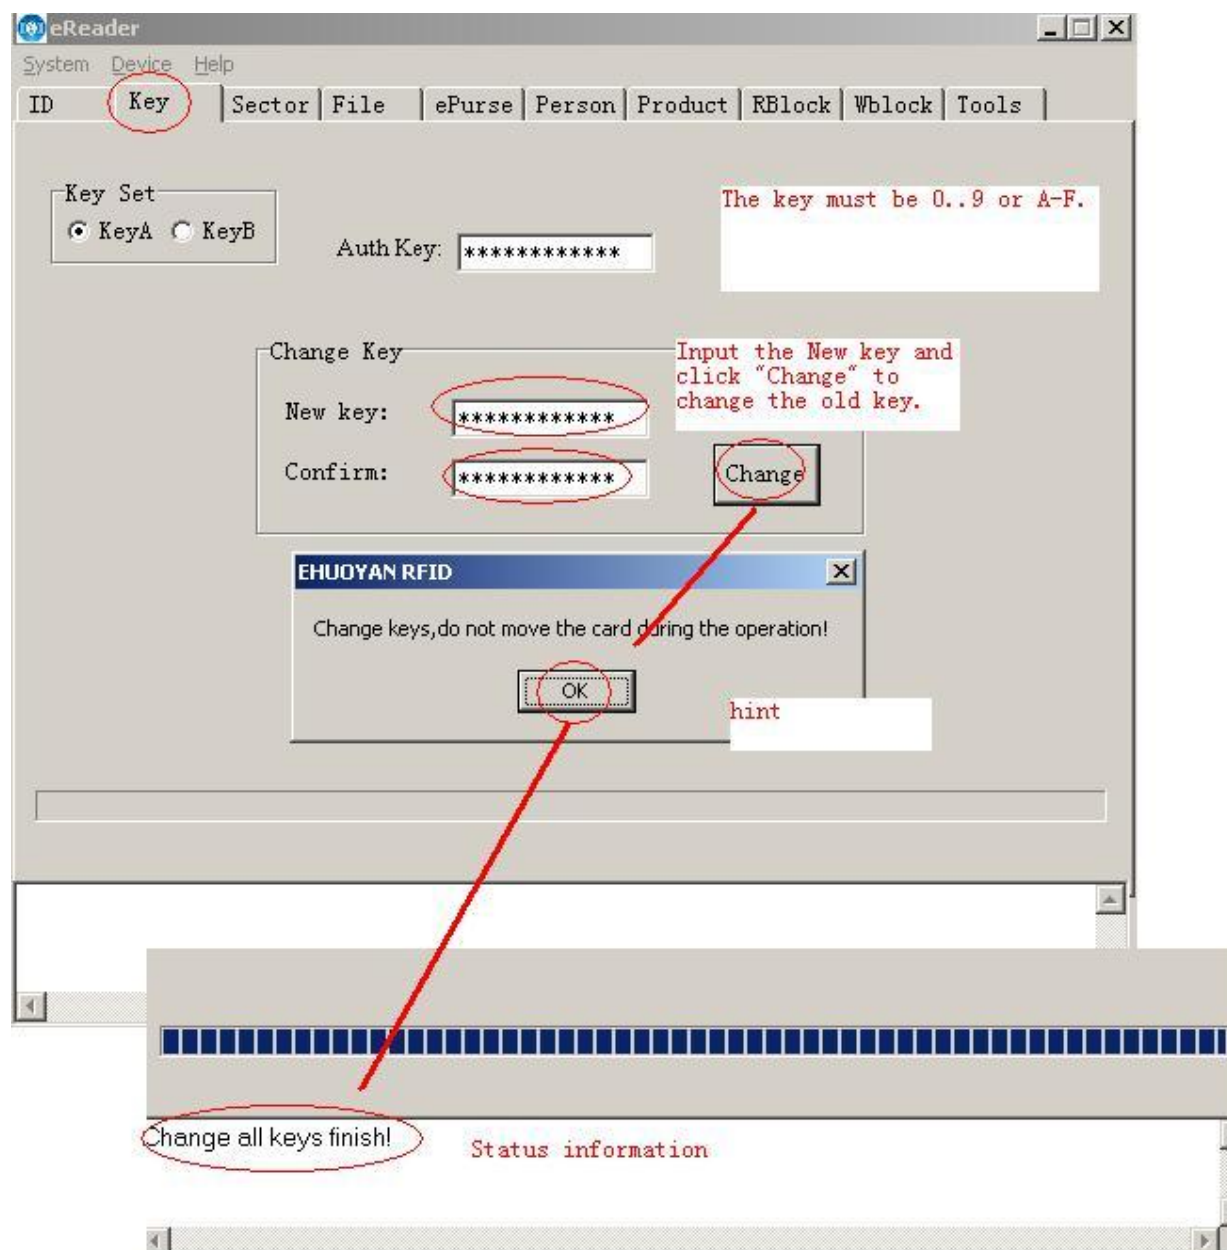

New key: \*\*\*\*\*

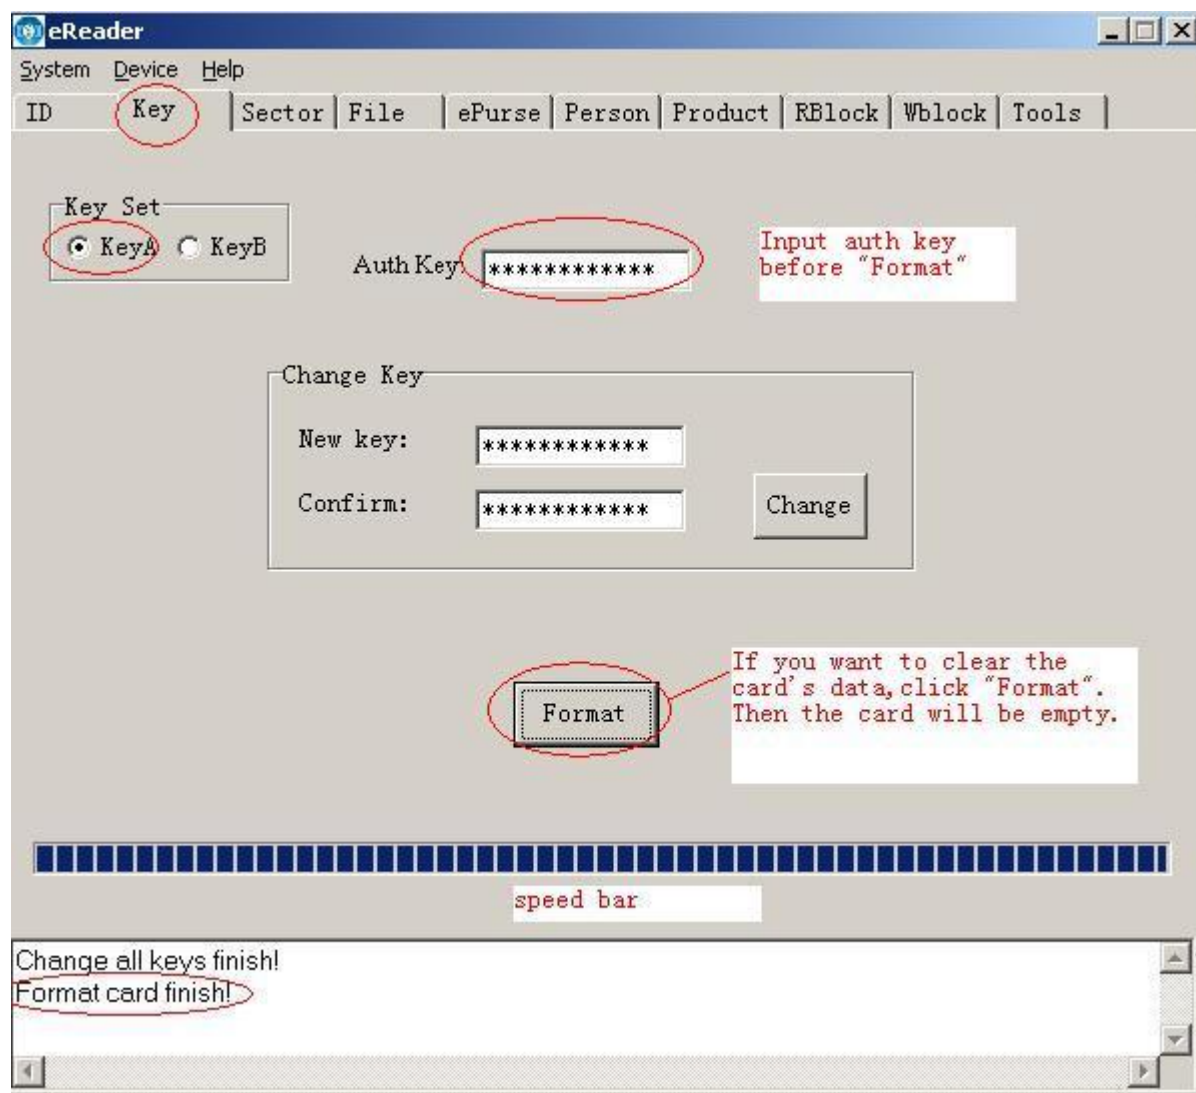

Confirm: \*\*\*\*\*

Change

Format

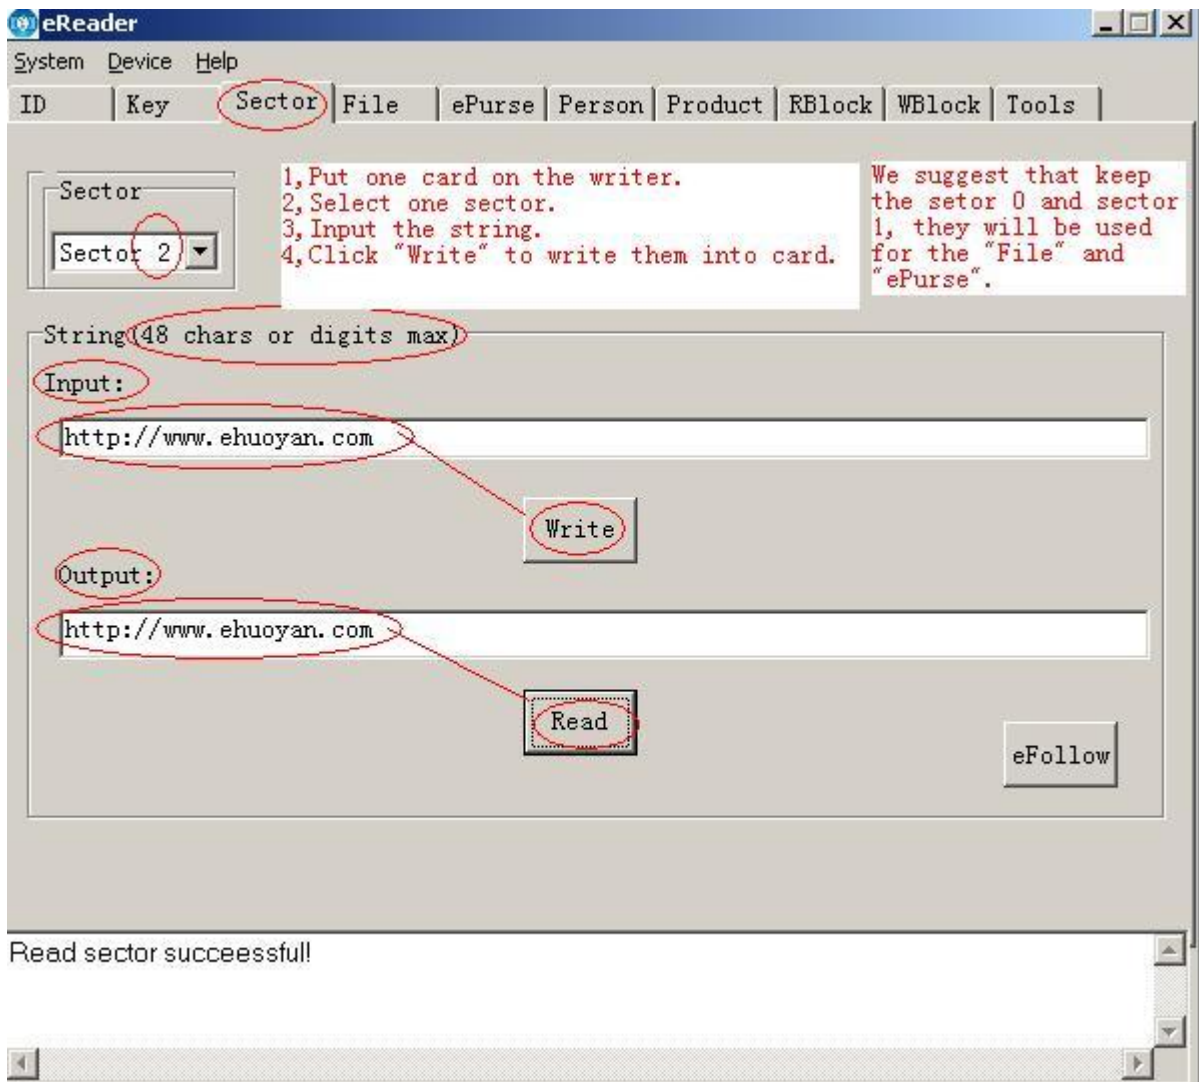

Connect OK!

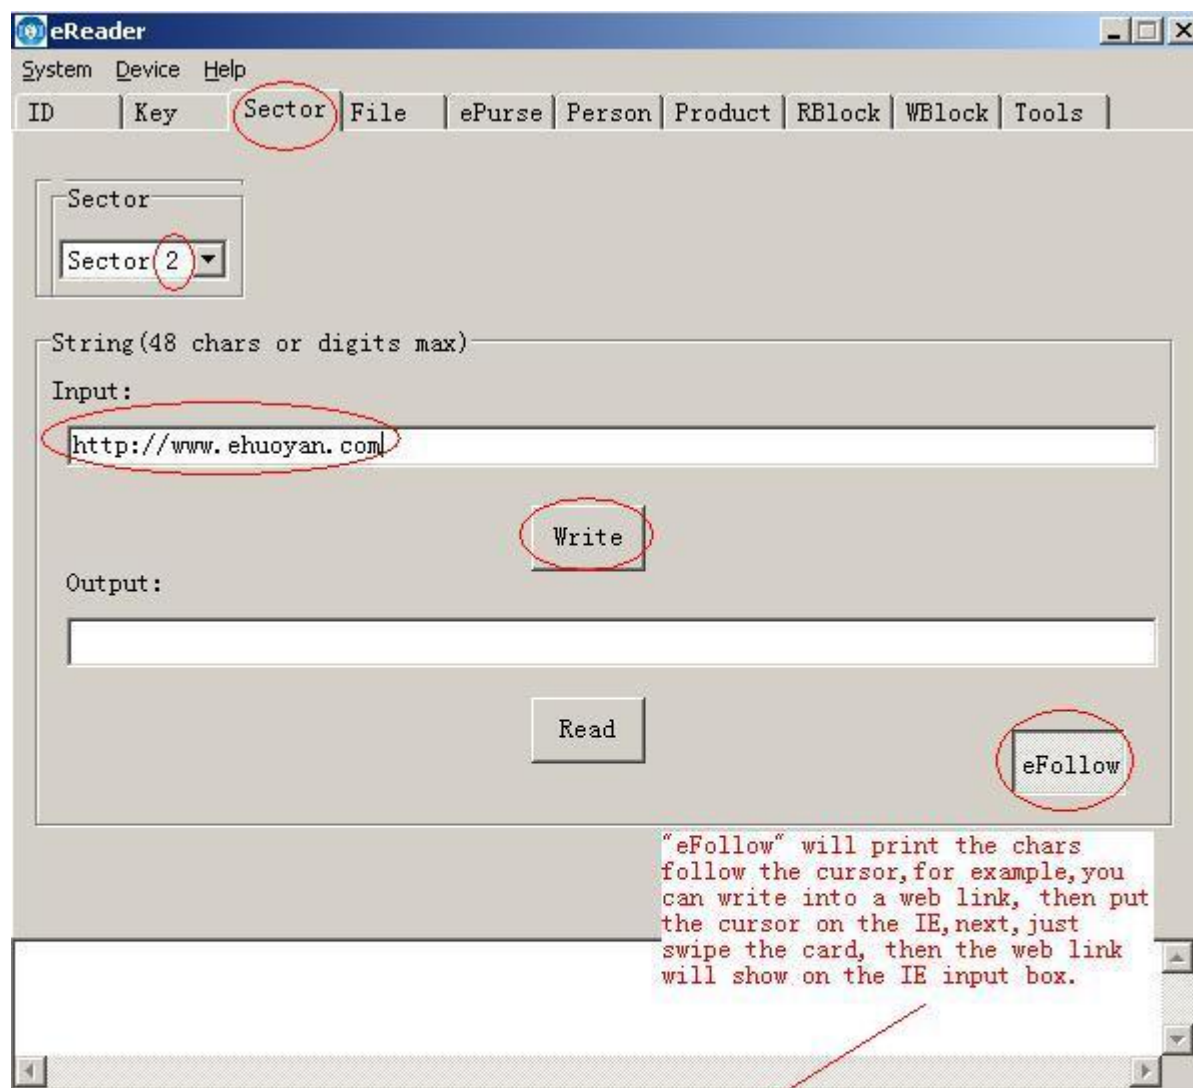

## 5. Sector

S50 has 16 sectors from 0 to 15, each sector can store 48 bytes data.

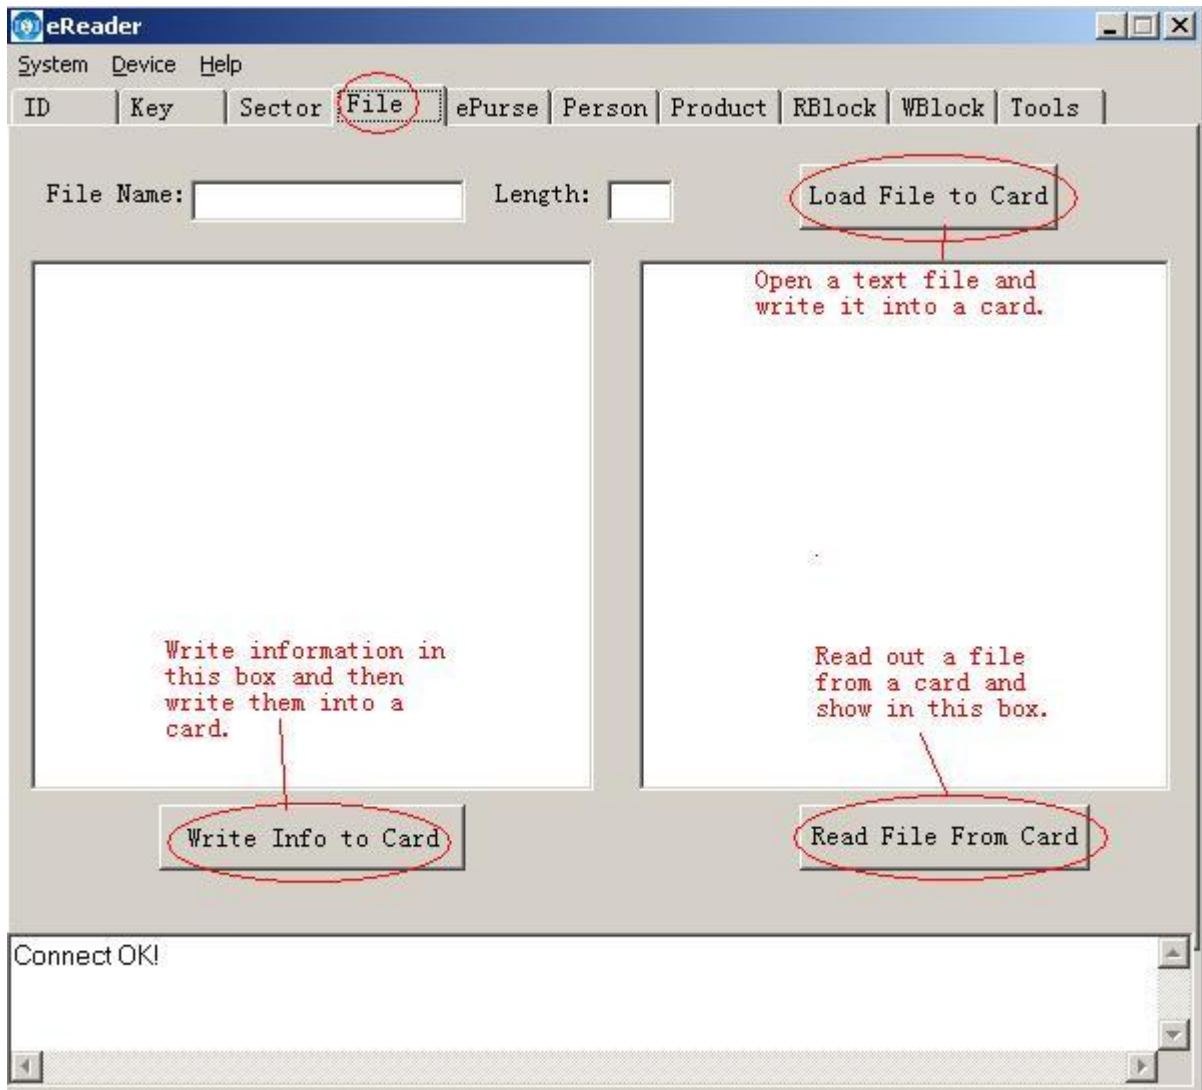

## 6. eFollow

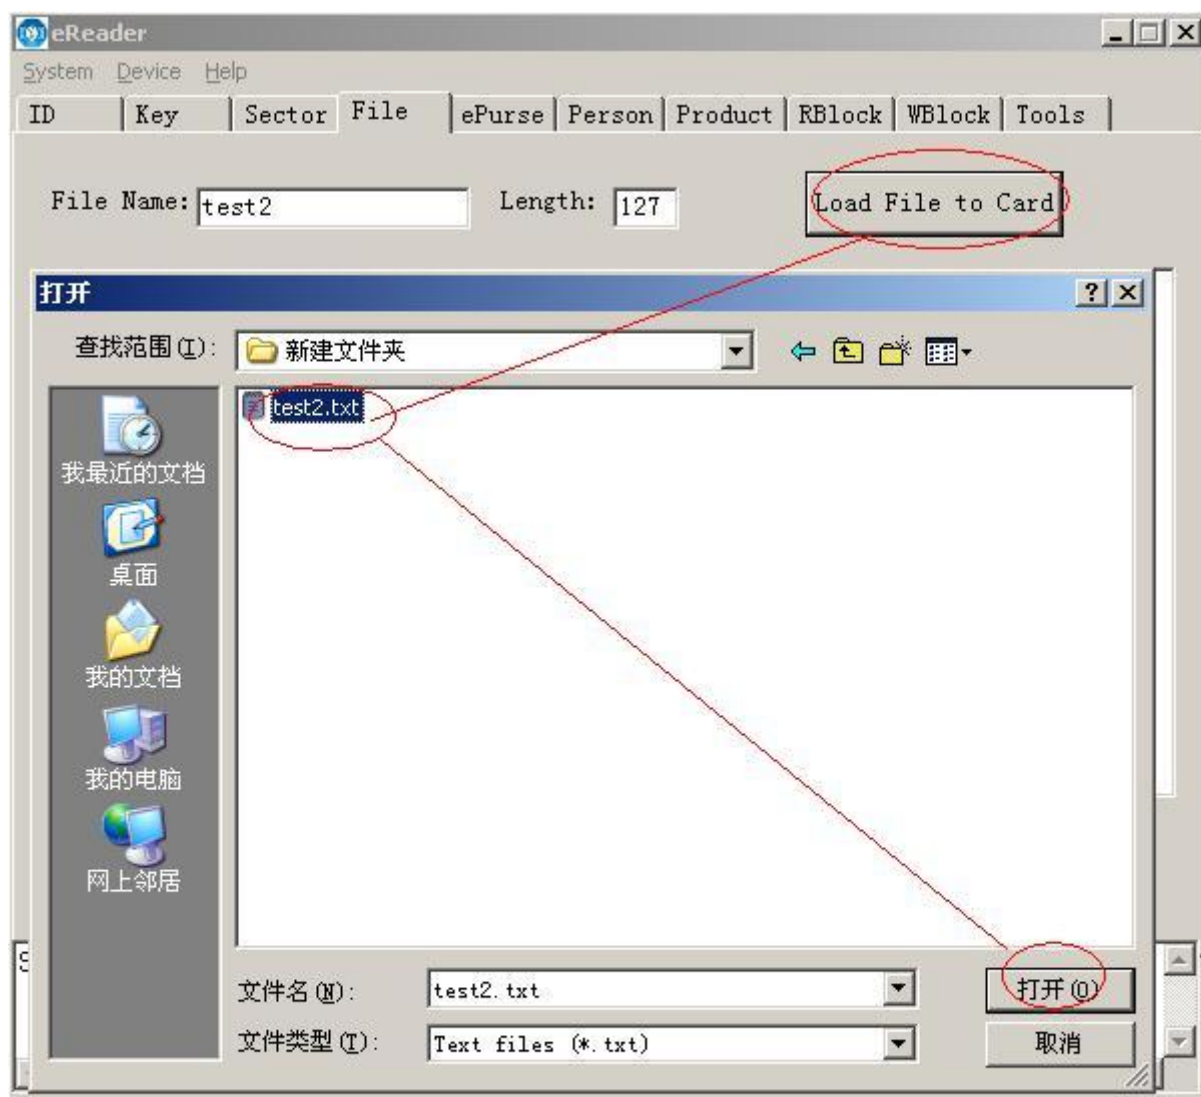

eFollow is a function which can read the sector's data then follow the cursor and print on it, it acts as key strike. Use the "eFollow", you can login to web link or facebook or somewhere else.

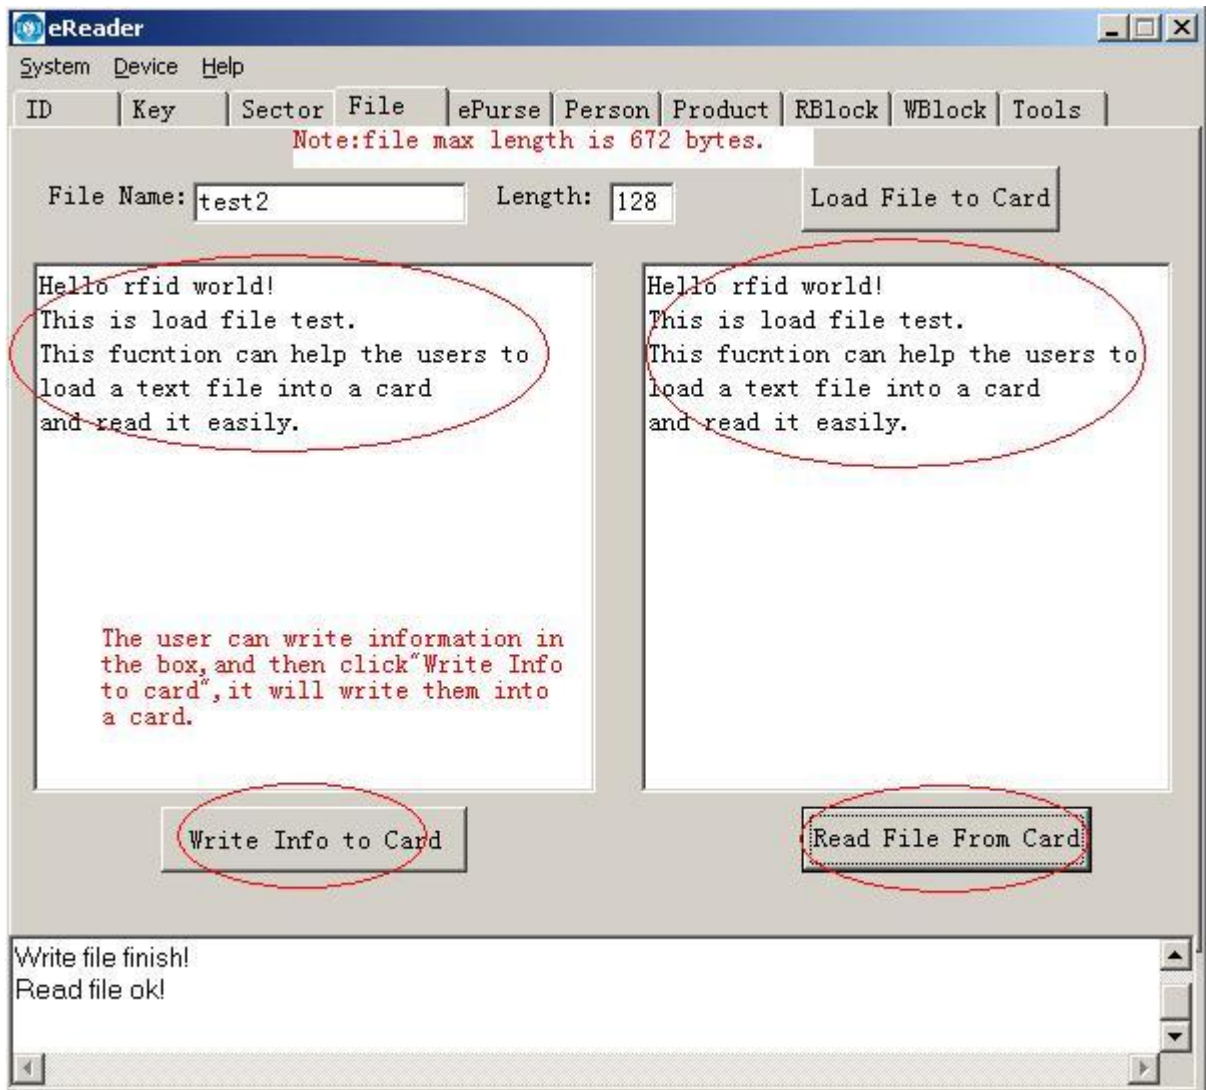

## 7. File

This function can help you to save files into the IC card, use this function the users need no database to store the data.

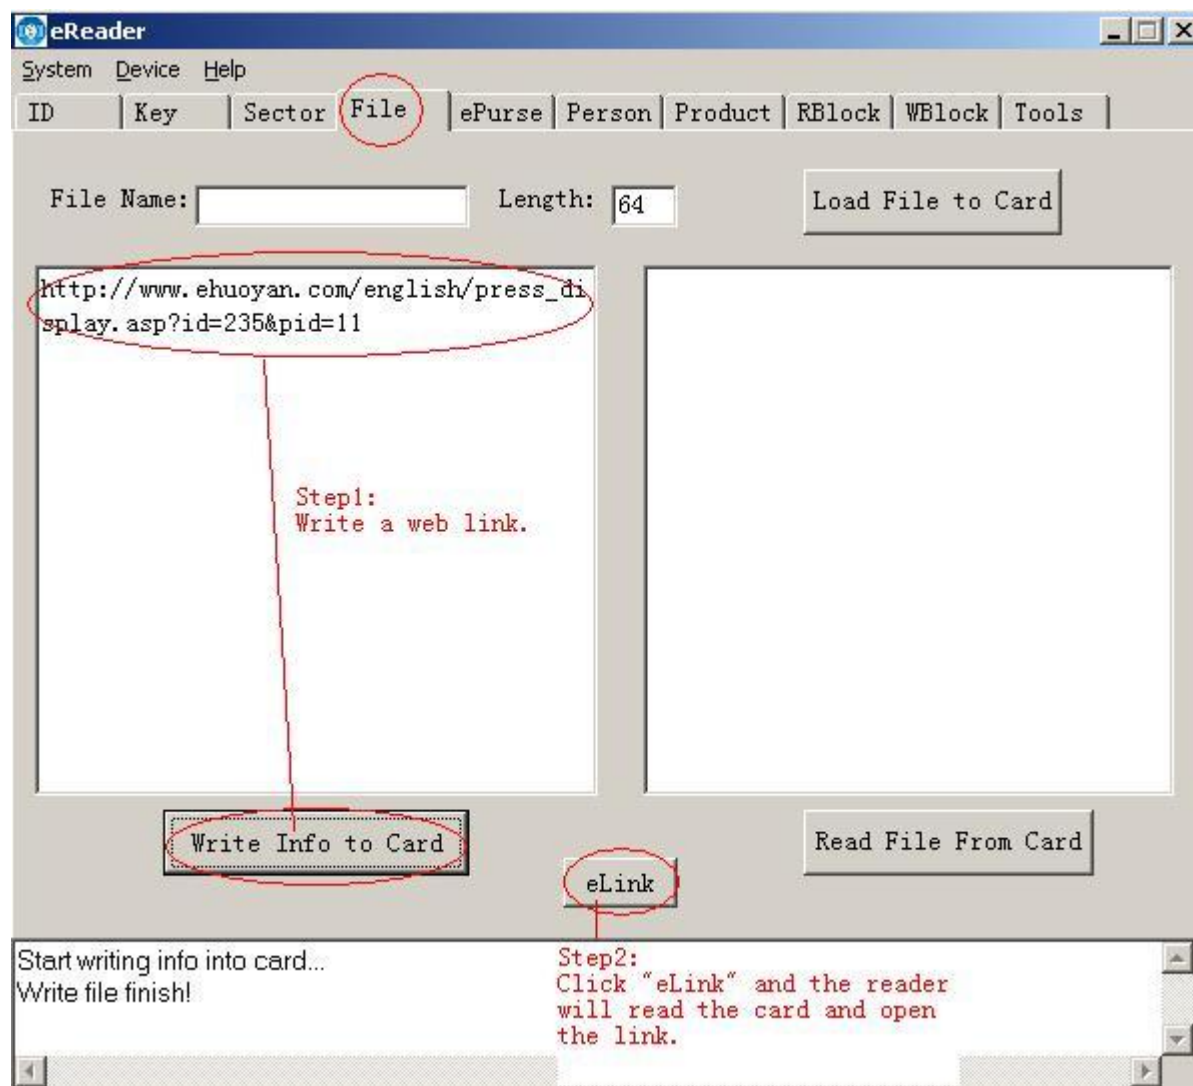

Click "Open" then the file test2.txt will load into the card.

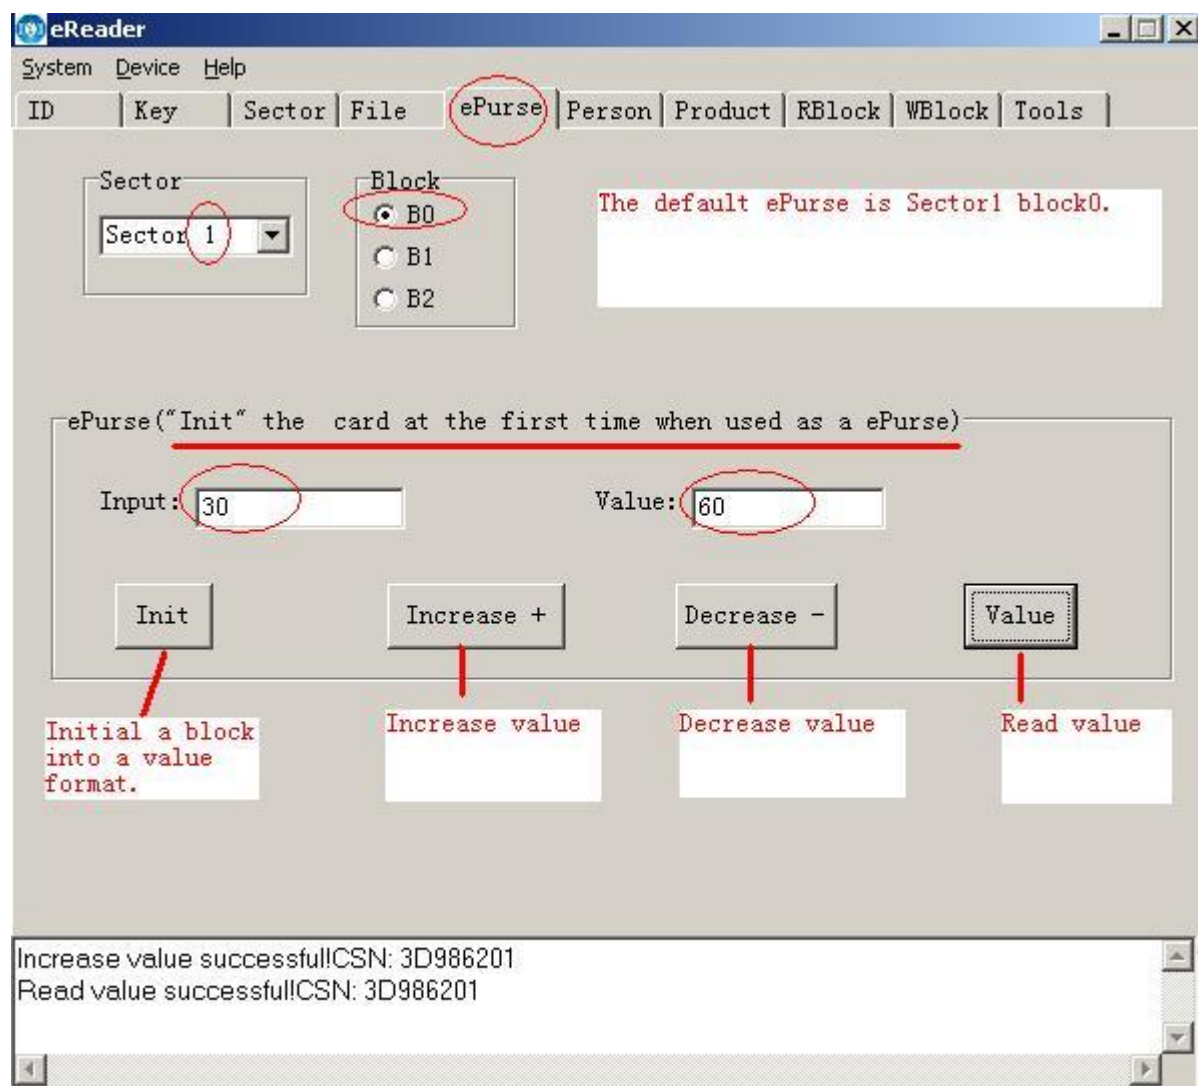

New function:eLink

By using the “eLink”, the reader will help you open a web link by swipe a card. This function can open a long link.

## 8. ePurse

## 9. Person
